

Step-by-Step Guide to Registration Manager

The **ConnectIT Registration Manager** provides a way to select which users should be registered to use the **ConnectIT-MSCRM** software. To open the **ConnectIT Registration Manager** application, browse to the **Start | All Programs | ConnectIT-MSCRM** menu and click the **ConnectIT Registration Manager** option.

Please note that internet access is required on the PC before ConnectIT-MSCRM can be registered and QuoteWerks should be running.

1. Go to the **ConnectIT-MSCRM** start menu options (by default in **Start\All Programs\ConnectIT-MSCRM**) and click the **ConnectIT Registration Manager** option.

2. To add a **User** to the list of **Registered Users**, highlight the appropriate User name on the grid to the left and click the right ">" button.
3. To remove a User from the list of **Registered Users**, highlight the appropriate User name on the grid to the right and click the left "<" button.
4. To refresh your license information from the **ConnectIT License Server** (which includes changes for additional licenses, etc) click the **Get License Info** button.
